

Instructor: Benjamin Zhang (pronounced j-ah-ng)

Office: Economics 309A

Email: Benjamin.Zhang@colorado.edu

Course website: D2L

Office Hours: T/TH 10:30 - 12:00 PM and by appointment.

TA: Jacob Howard, see mycuinfo for your recitation section.

Textbook:

Required: David Besanko and Ronald R. Braeutigam (2005). Microeconomics: An Integrated Approach, 5th edition. John Wiley & Sons, New York, ISBN 978-1-11857227. There is a study

The course is divided into three parts. The first deals with theories of consumer behavior and demand. We will show how a consumer may make optimal choices, how individual demands are formed, and how market demands can be derived. Part two discusses the firm's technologies and production. This lays the foundation for the study of firm behavior under different forms of market structure. The third part of the course integrates the previous material into models of prices and outputs under different market structures. A variety of market structures are examined including perfect competition, monopoly, and oligopoly. If time permits, we will close the semester with an introduction to game theory and the economics of information.

Grading Policy: Your course grade is composed of six parts.

Lecture attendance - 5%

Weekly problem sets - 20%

Recitation - 10%

Exam 1 - 15%

Exam 2 - 15%

Exam 3 - 15%

Cumulative final exam - 20%

Grading Scale: Standard ten-point scale with +/- (A+ not given)

Lectures: My lecture notes will not be publicly available, so if you miss a class you should plan on getting notes from a classmate. Lectures are intended to cover material from the book and connect the concepts to real world examples, providing additional in class practice when appropriate.

Attendance of the first two classes is mandatory, and non-attendance may result in being administratively dropped from the course. After the first week I will take attendance on random days, every unexcused absence will result in 0.5% from your lecture attendance grade. Your goal should be to show up to all lectures and preserving the full 5% you start with.

Weekly Problem Sets: Every Monday, I will assign a short problem set due Friday of the same week, at the beginning of lecture. They will be graded on completeness and randomly selected problems each week. Late assignments will not be accepted, the two lowest scores will be dropped.

Exams: Exams 1, 2 and 3 will not be cumulative beyond the cumulative nature of the material. I do not give make-up exams nor do I give exams early. Any unexcused absence on an exam day will result in a zero for that exam. No cell phone calculators are permitted for exams. Please bring a basic calculator or be prepared to do calculations with pen and paper.

If you have three or more final exams scheduled on the same day, you are entitled to arrange an alternative exam time for the last exam or exams scheduled on that day. Also, if you have two final exams scheduled to meet at the same time you are entitled to arrange an alternative examination time for the later course. To qualify for rescheduling final exam times, you must provide evidence that you have three or more exams on the same day or two exams meeting at the same time, and arrangements must be made with your instructor no later than the late drop deadline.

Office Hours: These are for your benefit, take advantage of them. It is an excellent opportunity to get individual or small group help to clarify concepts from class. If my office hours do not work for you due to another class or work, please email me and we can arrange a time to meet.

Email: Please use email wisely. I will do my best to respond to emails in a timely fashion, usually

less than 2 hours - keep in mind your instructors also have lives, do not expect a fast response out of regular business hours (M-F 8-5). If your question has to do with clarification, it may be difficult to explain fully over email, so I will suggest coming to office hours. If I feel the entire class could benefit from the clarification, I will do so in lecture. Finally, I will not answer emails which ask something administrative which is included on the syllabus, i.e. when is the exam?

Extra Help : Do not hesitate to come to my office during office hours or by appointment to discuss a homework problem or any aspect of the course. You also may want to consider the free tutoring lab offered by the department, they do a wonderful job helping students! If you want to hire a graduate student tutor (for a fee), you can find a list of such people through the department website.

Important Dates : <https://www.colorado.edu/academics/academic-calendar>

First Exam	February 16th
Second Exam	March 16th
Third Exam	April 27th
Course Final	May 7th

Tips for Success : Things that I think generally help you do well in my class:

- 1) Read the book chapter before class. This will greatly increase what you get out of lecture, and improve recollection of the material for the exam.
- 2) Skim the book chapter again after class. Recall the concepts which seemed difficult prior to class, those that are still difficult, and those that seem easy.
- 3) Do the homework as we cover the material in class. Do not wait until the day/day before the exam. If you work as we go, the homework will naturally build from lecture materials, and won't take as long as if you wait to tackle it at midnight.
- 4) Use office hours effectively. This means coming prepared with specific questions either from lecture, homework or other sources.
- 5) Use the tutoring lab, and/or hire a private tutor.
- 6) Come to class. This seems like a no-brainer, but it always amazes me how many students skip every lecture, only to be lost come exam time.
- 7) Don't be afraid to ask questions, or to ask for help!
- 8) Finally, don't cheat. If you don't know the material, own up to it, and take the grade you earn.

University Policies:

Disability Policy : If you qualify for accommodations because of a disability, please submit a letter from Disability Services to me in a timely manner so that your needs may be addressed. Disability

be subject to discipline. Faculty have the professional responsibility to treat all students with
