Class location: Duane G131

Course overview

This class provides an introduction to environmental economics, with a focus on how economic tools help us understand and address environmental problems. The course will cover: why environmental problems arise, using the theory of externalities and the theory of public goods; the economic tools available to correct these market failures; how to evaluate alternative environmental policies and value improvements to the environment; and the real-world environmental policy landscape in the US and internationally, including how regulations havintrod44-S andeWe(r7hcthe)-2PJer

15% class participation (iClicker questions, in-class discussions)

Unit II. Environmental market failures and policy solutions.

C&T Ch. 3-5

Unit III. Benefit-cost analysis.
