# Course Description

This course reviews selected topics from both international nance and open-economy macroe-conomics. From international nance, we will discuss international nancial markets and their operations. From open-economy macroeconomics, we will discuss macroeconomic policies and their implications. Obviously, most of our time will be devoted to further our understanding of \exchange rates."

#### Here are some stylized facts:

- 1. Real and nominal exchange rates are highly correlated.
- 2. Changes in both real and nominal exchange rates are persistent.
- 3. Forward exchange rates are poor and biased predictors of future spot exchange rates.
- 4. International di erences in interest rates are large and persistent.
- 5. Portfolios are not internationally diversi ed.
- 6. The extent of international consumption risk-sharing is less than expected.
- 7. Savings and investment are highly correlated.
- 8. The trade balance and the current account are countercyclical.
- 9. Business cycles are correlated across countries.
