

**Economics 4999-001**  
**The Economics of Migration**  
**Fall Semester, 2007**

My intention is to work closely with each of you to help you design a program of study of your own. This program of study will be strongly oriented toward your research topic. However, from time to time I will suggest articles for you to read in connection with my lectures.

To participate you must be in attendance. **In this class I have an “attendance clause” (see below).** Whether students make their presentations early in the term or late, I want them to have an audience. Moreover, I want this class to be a pleasant and exciting learning experience for each of you. Your experience is in an important sense tied not only to your own participation, but also to that of your fellow students.

## ASSIGNMENTS

1. A 3 to 4 page (doubled-spaced) critique of a current article (or editorial) regarding U.S. immigration taken from the popular press (i.e., newspaper or magazine). (Internet articles are not acceptable unless they have been published in the popular press.) Please attach to your critique a copy of the article you select. Points will be deducted for failure to meet the length requirement noted above. Oral presentations should be about 5 to 7 minutes.

Due: September 10 (Presentations begin during the week of September 24.)

Points: 20

2. We will have a debate regarding U.S. immigration. This will be held during the week of October 15.

Points: Debate 15

3. A major research paper. During the first four weeks of the class, each student is to identify a topic for detailed study. The deadline for you to decide on a topic is September 26, when a two-page prospectus is due. By September 26, I expect each student to have discussed his/her topic with me and received my approval to proceed with that topic. This is the study that you will be presenting during November and December. A draft of your paper is due two weeks before your presentation. The final draft is due December 14. Your paper must contain at least six (6) references of which at least three (3) must be “hard” (i.e. not internet). You will be expected to make an oral presentation of your work. The presentation must occupy about 18 to 20 minutes, not including questions from the class and your answers to these questions.

## Summary of Points:

1. Critique:	Discuss with professor	2
	Critique itself	18
2. Debate:	Discuss with professor	2
	Presentation and discussion	13
3. Research Paper:	Discuss with professor	4
	High quality paper	31
	Oral presentation	15
